## Product

Remco Technology provides high quality product, ability to source, fabrication capabilities, technical support, low competitive price and limited warranty. We guarantee the product fit, materials and workmanship for a one year.

Our product is unique heat /sound insulation, specifically designed for particular piece of equipment ( custom) in accordance with client specification, that can be used to insulate surfaces of reactors, turbines, boilers, mixers, tanks, pipelines, air blowers and pumps, valve or any other equipment where temperature or noise control is required.

Our product works in wide range of surface temperatures ( from as low as -50 F to as high as +2000 F) and under various environmental or technological conditions including highly aggressive ones.

Remco product allows to achieve stable thermal regime inside of the insulated equipment and in the environment substantially, reducing heat loss, emissions and industrial noise and improving safety.
